RE: OHV Grant Application for USFS – Klamath National Forest, Humbug OHV Staging Area Development dated 3/07/13.

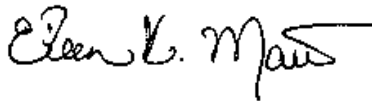

To Whom It May Concern,

I have had the opportunity to review the preliminary application submitted for the Humbug OHV Staging Area Development and you are now asking for public comment. As the OHV Grant Rules and Regulations continue to require more time and energy from your personnel, I appreciate your time and efforts in complying with these changing standards. Please do not give up on the program; our OHV programs depend on you. I know how much time it requires and we do need your help to keep these OHV areas open. Your efforts are greatly appreciated and enjoyed by all OHV users.

Grant Project Application titled "Klamath National Forest, Humbug OHV Staging Area Development" dated 03/07/13 requests a total of \$147,775.12 in grant funding. I endorse this grant application for development of the Humbug OHV staging area including the installation of toilets, signs, barriers, picnic areas, drainage structures, and the other facilities covered in the request. My family, friends and I have used this area and are grateful to have the staging area. Do to its location, restrooms, picnic tables, and a better parking area is a much needed addition to the staging area.

On behalf of my family, friends and myself, I'd like to thank the Klamath National Forest for their support and hard work so that we may better enjoy our sport of ATVing.

Sincerely,

A handwritten signature in black ink, appearing to read "Eileen K. Maier". The signature is fluid and cursive, with a long horizontal stroke at the end.
